

us 1. Florida International University — VERY STRONG

This is one of the best matches I found.

The Department of Civil and Environmental Engineering is recruiting two fully funded PhD students for Spring 2027 or Fall 2027.

The project is:

Urban Water Systems + AI/Machine Learning

Research involves:

sewer-system modelling

CFD

PySWMM

real-time sewer-system monitoring

machine learning

Python/C++

urban water management

The posting specifically says international applications are welcome for another FIU Civil Engineering PhD project, and the research group is actively recruiting. [?](#)

CSDMS +1

There is also a second FIU project involving:

Urban Heat Modelling + AI/CFD

with two fully funded PhD positions, starting Spring/Fall 2027, and international applications explicitly welcome. The closing date is October 31, 2026. [?](#)

CFD Online

Contact: Dr. Arturo Leon

Email: arleon@fiu.edu

This is an opportunity I would put near the top of your list.

us 2. University of Minnesota

A very interesting opening is with Dr. Alexander Michalek in the Department of Civil, Environmental and Geo-Engineering.

They are recruiting 2 fully funded PhD students.

Research

hydrologic modelling

hydraulic modelling

climate change

natural hazards

risk assessment

uncertainty quantification

ecohydrology

computational modelling

The position accepts backgrounds including:

Civil Engineering, Environmental Engineering, Earth Science, Geoscience and Atmospheric Science.

Start:

Spring 2027

Fall 2027

The advertised Spring 2027 deadline is August 31, 2026, making this particularly urgent. ?

LinkedIn

Supervisor: Dr. Alexander Michalek

Email: mich0586@umn.edu

ca 3. University of Toronto

This one is especially attractive.

A research group in the Department of Civil and Mineral Engineering is recruiting a graduate researcher for January 2027.

Project

## Semi-Autonomous Monitoring to Support Water Resources Planning and Management

The project combines:

Civil Engineering

Water Resources

AI

machine learning

UAVs

USVs

monitoring

decision-support systems

It is advertised as a fully funded MASc/PhD position, and PhD applicants may be international. [?](#)

Josh's Water Jobs +1

This could be an excellent opportunity if your Civil Engineering background includes water resources, environmental engineering, data analysis or modelling.

ca 4. McMaster University

This is a newly advertised opportunity.

The Laboratory for Multiscale Geomechanics in McMaster's Department of Civil Engineering is seeking two fully funded PhD candidates.

Research

computational geomechanics

large-deformation modelling

geostructures

thermo-hydro-mechanical modelling

geomaterials

porous multiphase materials

FEM

DEM

MPM

SPH

molecular dynamics

Preferred starts:

January 2027 or September 2027.

Applicants with backgrounds in:

Civil Engineering

Mechanical Engineering

Materials Engineering

related fields

are encouraged. 

ALERT Geomaterials

This is a particularly good target if your Civil Engineering background is geotechnical/structural/materials.

ca 5. Queen's University

Another very good opportunity is:

PhD — Buried Pipeline Geohazards and Ground Motion

Research includes:

geotechnical engineering

structural engineering

pipeline engineering

soil movement

geohazards

sensing

fibre-optic sensors

experimental testing

Python/Matlab

large-data analysis

The advertised funding is approximately:

C\$35,000/year for four years

and the position is described as fully funded.

Most importantly:

Domestic and international applicants are welcome.

The position can start September 2026 or January 2027, and applications are being reviewed immediately. [?](#)

Apply Kite

Supervisor: Geoff Eichhorn

This is another one I would treat as urgent.

ca 6. UBC — safest broad Civil Engineering funding option

UBC is different because you don't necessarily have to find one advertised project first.

The UBC Civil Engineering PhD covers:

structural engineering

earthquake engineering

geotechnical

environmental

water resources

hydrotechnical

transportation

construction management

civil materials

geo-environmental engineering. [?](#)

UBC Grad School

And this is extremely important:

UBC guarantees at least C\$40,000/year

Beginning September 2026, all full-time UBC-Vancouver PhD students receive at least C\$40,000 per year for their first four years. [?](#)

UBC Grad School

For September 2027:

International application deadline: January 31, 2027. [?](#)

UBC Grad School

UBC therefore belongs near the top of your Canadian list.

us 7. University of South Carolina

I found two active PhD research assistant openings under Dr. Fabio Matta.

Project A

FRP-reinforced concrete bridge decks

Research includes:

structural engineering

concrete

bridge engineering

FRP reinforcement

low-carbon concrete

life-cycle assessment

life-cycle cost analysis

Project B

Sustainable earthquake-resistant earth masonry

Research includes:

structural testing

earthquake engineering

masonry

structural analysis

numerical modelling.

Both include a 12-month stipend, tuition, health insurance and fees through the graduate research assistantship. [?](#)

University of South Carolina +1

Supervisor: Dr. Fabio Matta

Email: fmatta@sc.edu

us 8. Arizona State University

Dr. Angeli Jayme's group is recruiting a funded Civil Engineering PhD student for Spring 2027.

Research

Pavement Engineering / Structural Mechanics

Strong candidates have experience with:

FEM

MATLAB

Python

structural mechanics.

The position is reported as funded through the ASU SSEBE RA/TA package, including tuition, stipend and health insurance, and international students can apply. [?](#)

LinkedIn

Supervisor: Dr. Angeli Jayme

Email: Angeli.Jayme@asu.edu

The position is described as rolling / until filled, so I would not wait.

us 9. University of Mississippi

Dr. Liang Cao is recruiting PhD students for:

Fall 2026

Spring 2027

Fall 2027

Research

Smart and resilient infrastructure

including:

structural control

artificial intelligence

resilient infrastructure

extreme environments

earthquakes

wind

offshore systems

structural mechanics.

Multiple positions are described as fully funded, with applications reviewed on a rolling basis. 

LinkedIn

Email: lcao2@olemiss.edu

us 10. UNC Charlotte

Dr. Yu Hou is recruiting 1–2 PhD students for Spring/Fall 2027.

Research includes:

building energy performance

energy audits

Scan2UBEM

construction robotics

digital technologies.

Funding is expected to include:

stipend + tuition support + health insurance.

Civil Engineering applicants are explicitly eligible, as are applicants from several related engineering fields. [?](#)

INES

us 11. Texas A&M University–Corpus Christi

This is another strong water-related option.

Two PhD positions

Research:

Water Digital Twins

including:

regional water resources

hydrologic modelling

reservoir operations

environmental flows

digital twins.

The two positions are expected to start Spring 2027 and are fully funded for up to four years.

The application deadline is September 15, 2026. [?](#)

CSDMS

A master's in Civil Engineering, Environmental Engineering or related field is required.

us 12. USC — University of Southern California

Dr. Jiachen Zhang's Air Pollution–Climate–Equity Research Group is recruiting a fully funded PhD student for Fall 2027.

The research combines:

civil/environmental engineering

air pollution

climate

transportation systems

urban systems

machine learning

atmospheric modelling

natural disasters.

The group asks applicants to identify Dr. Zhang as a potential advisor in the USC PhD application. [?](#)

USC Sites

Email: [jiachen.zhang@usc.edu](mailto:jiachen.zhang@usc.edu)

Preferred application timing: November 30, 2026, with December 15 indicated as the latest date.

CA 13. McGill — Concrete Reuse

This is a particularly interesting sustainability project.

Research

Concrete Reuse — Advanced Deconstruction and Reconstruction Methods

The project covers:

construction engineering

concrete

structural systems

circular economy

automation

optimization

life-cycle analysis.

Funding:

100% tuition coverage for four years

C\$24,000/year stipend

benefits

additional scholarship opportunities

paid TA opportunities. [?](#)

Association Bernard Gregory

Applicants can have a master's degree in:

Civil Engineering, Architecture or related fields.

Expected start: January 2027, with exceptional candidates potentially starting September 2027.

us 14. Kansas State University

The Civil Engineering Department has advertised fully funded PhD positions for Spring/Fall 2027.

The research focus is:

Structural Engineering + AI/ML + Computational Modelling

The opportunity specifically lists an international applicant deadline of August 1, 2026. [?](#)

Owlindex

 This one is urgent because that date is only about two weeks away.

us 15. University of Wyoming

The Rojas Research Group in Civil & Architectural Engineering and Construction Management has been recruiting 1–2 PhD students.

Entry:

Fall 2026

Spring 2027

Funding is described as a fully funded research assistantship, and international students are eligible. [?](#)

Gradualin

Research areas include:

civil engineering

infrastructure

structural engineering

geotechnical engineering

transportation

water

environmental engineering

construction.
